

*moving limits  
since 2002*

- Founded in 2002 and headquartered in Austria, Innofreight is a privately held company owned by the Wanek-Pusset family.
- Innofreight is specializing in the design, engineering, sale and leasing of innovative, patented rail wagons, containers and unloading systems.
- Originally focused on the transport of products for the wood industry, Innofreight now serves a range of industries.
- **140** employees
- On track in **20** countries
- **6** locations in Europe

## 2,700 InnoWaggons

23,000 container and superstructures

10 stationary unloading machines, 60 forklifts  
unloading 2 million times per year

Using Innofreight technology saves around  
200,000 tons of CO<sub>2</sub> per year.

To compensate for this amount of CO<sub>2</sub>  
around 16 million trees would have  
to be planted. An that every year.

# Production

Establishment of a production network

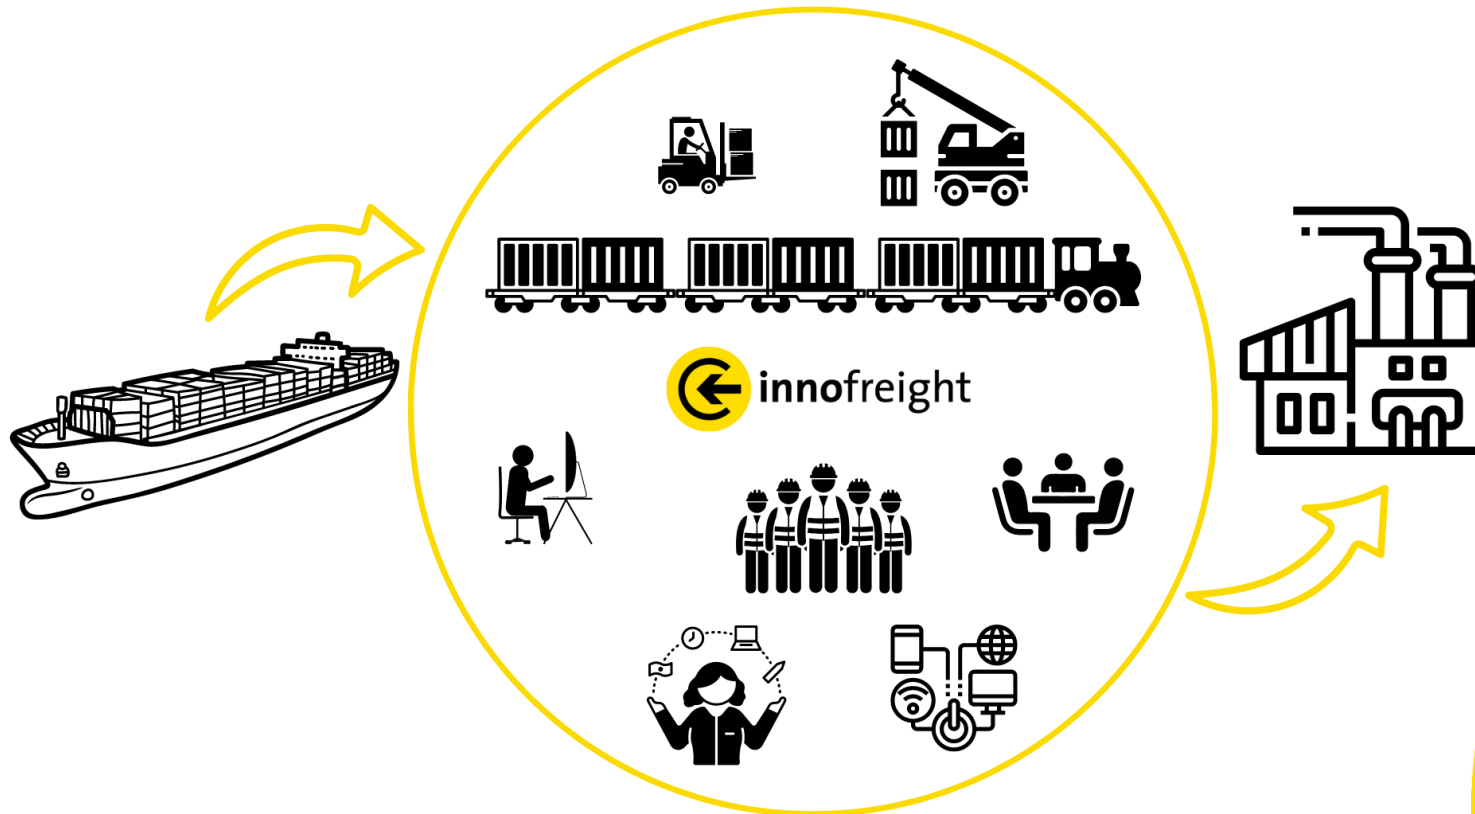

- Participation in production
- Ensuring delivery times and product quality

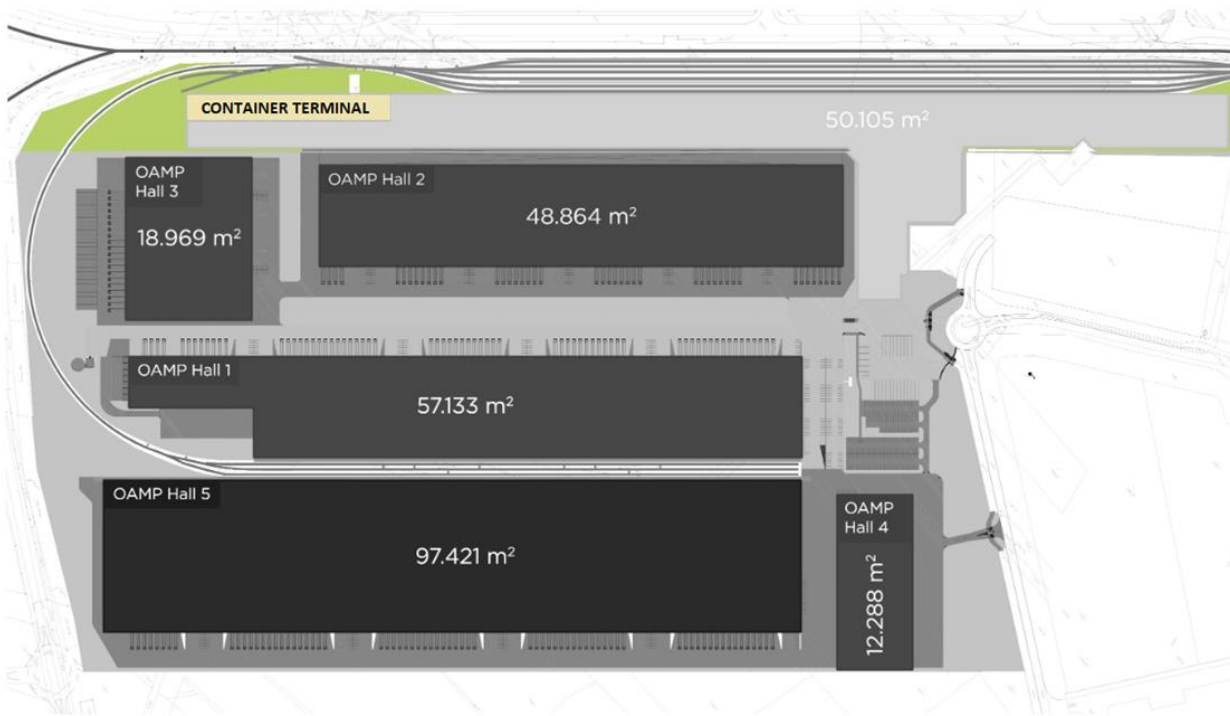

# Goal

Creation of a one-shop solution for customers  
Handling the entire transport chain from A to B

# Terminál Mošnov

## Key figures

- 6x700m of railtracks
- 4 km of traction line
- 50,000 m<sup>2</sup> of container manipulation area
- 8 trains/day current capacity
- 3 reachstackers
- 100 LKW parking spaces
- 12 employees
